AI MARKETING PROMPT LIBRARY

A practical toolkit for SEO, AEO/GEO, social media, branding, B2B lead generation, and campaign strategy

43 reusable prompts • Beginner-friendly • Portfolio-ready

Prepared as an editable learning and portfolio project

Version 1.0 | October 2026

How to Use This Library

Replace bracketed placeholders with accurate details. Provide source material where possible. Review every output for factual accuracy, audience fit, privacy, and compliance. AI output varies by model and input quality.

Testing note: This package contains structured prompts and illustrative examples. The prompts have not been executed against an AI model as part of file creation. Use TESTING_LOG.md to record actual test runs before describing them as tested or validated.

Contents

1. SEO & Content Optimization
2. AEO & GEO
3. Social Media Content
4. Branding & Messaging
5. B2B Lead Generation & Sales Enablement
6. Campaign Strategy & Measurement
7. Worked Examples

SEO & Content Optimization

SEO-01 — Search Intent & Keyword Mapping

Prompt
Act as an SEO strategist. Business: [BUSINESS]. Website/page: [URL OR TOPIC]. Target audience: [AUDIENCE]. Target market: [COUNTRY/REGION]. Primary goal: [GOAL]. Review this keyword list: [KEYWORDS]. Group keywords by search intent (informational, commercial, transactional, navigational), recommend one primary keyword and 3–6 secondary terms per page, identify likely cannibalization, and suggest a page type. Do not invent search-volume or difficulty data; mark missing metrics as “needs tool validation.” Return a table with rationale and next action.

SEO-02 — SEO Brief Builder

Prompt
Create an SEO content brief for [TOPIC] targeting [AUDIENCE] in [MARKET]. Primary keyword: [PRIMARY KEYWORD]. Secondary terms: [TERMS]. Search intent: [INTENT]. Include proposed title tag, H1, URL slug, meta description, outline with H2/H3s, questions to answer, internal-link opportunities, evidence/expert input needed, CTA, and quality checks. Avoid keyword stuffing and unsupported claims. Flag assumptions.

SEO-03 — On-Page SEO Audit

Prompt
Act as a technical/on-page SEO reviewer. Analyze the page details I provide: URL [URL], title [TITLE], meta description [META], H1/H2 structure [HEADINGS], copy [COPY], image alt text [ALT TEXT], internal links [LINKS], and target keyword [KEYWORD]. Identify issues by impact (high/medium/low), explain why each matters, and recommend specific fixes. Do not claim you crawled the live site unless browsing data is provided. Separate observed facts from hypotheses.

SEO-04 — Title Tag & Meta Description Variants

Prompt
For this page [PAGE DETAILS] and target query [KEYWORD], write 8 distinct title tags and 5 meta descriptions for [AUDIENCE/MARKET]. Keep them accurate, natural, differentiated, and aligned with search intent. Do not promise rankings or include facts not supplied. Label each option by angle and recommend one with a short rationale.

SEO-05 — Content Refresh Plan

Prompt
Review this existing content [PASTE CONTENT] for target audience [AUDIENCE], target query [KEYWORD], and business goal [GOAL]. Identify outdated, thin, repetitive, unclear, or unsupported sections. Propose a prioritized refresh plan, additions/removals, internal links to consider, examples/evidence to source, and a revised outline. Preserve useful original insights and do not fabricate statistics or citations.

SEO-06 — Internal Linking Suggestions

Prompt
Given these page summaries and URLs [PASTE URL + SUMMARY LIST], suggest relevant internal links for the page [TARGET PAGE]. For each suggestion, provide source page, destination page, natural anchor text, contextual placement, and rationale. Only use URLs supplied. Avoid repetitive exact-match anchors and links that do not genuinely help readers.

SEO-07 — Local SEO Page Draft

Prompt
Draft a useful local landing page for [SERVICE] in [LOCATION] for [BUSINESS]. Audience: [AUDIENCE]. Differentiators: [VERIFIED DIFFERENTIATORS]. Include a clear H1, service details, process, FAQs based on supplied customer questions, trust signals, and CTA. Do not create fake addresses, testimonials, awards, service areas, or local claims. Avoid near-duplicate city-page wording.

SEO-08 — SEO Reporting Summary

Prompt
Turn the following SEO data into a concise stakeholder report: [PASTE DATA]. Reporting period: [PERIOD]. Goals: [GOALS]. Summarize changes in clicks, impressions, CTR, rankings, conversions, and landing-page performance where data exists. Distinguish correlation from causation, call out data limitations, identify 3 insights and 5 prioritized actions. Never invent missing metrics.

AEO & GEO (Answer / Generative Search)

AEO-01 — Answer-First Content Rewrite

Prompt
Rewrite this content for people seeking a direct answer: [CONTENT]. Question/topic: [QUESTION]. Audience: [AUDIENCE]. Start with a concise, self-contained answer, then explain context, steps, exceptions, and useful details. Use clear headings and plain language. Preserve factual meaning; flag claims requiring verification. Do not claim this guarantees inclusion in AI answers.

AEO-02 — FAQ Development from Real Questions

Prompt
Using these customer questions, support tickets, or interview notes [PASTE INPUT], create a prioritized FAQ for [PRODUCT/SERVICE]. Write each question in natural language and answer accurately using only supplied facts. Mark unanswered questions as “business input required.” Avoid repetitive questions and sales-heavy answers.

AEO-03 — Structured Data Readiness Checklist

Prompt
For this page type [PAGE TYPE] and content [PAGE DETAILS], create a structured-data readiness checklist. Recommend only schema types that accurately fit the visible page and current search-engine guidance. List required source facts, validation steps, and risks. Do not invent properties or claim that schema guarantees rich results. Note that implementation should be checked against official documentation.

GEO-01 — AI Search Visibility Content Audit

Prompt
Evaluate the content below for clarity, factual support, entity clarity, answer usefulness, source quality, and distinctiveness: [CONTENT]. Topic: [TOPIC]. Audience: [AUDIENCE]. Score each dimension from 1–5 with evidence from the supplied text, then recommend prioritized improvements. Do not claim to measure actual AI-platform visibility without platform-specific evidence.

GEO-02 — Evidence-Rich Expert Content Outline

Prompt
Create an outline for an original, useful article on [TOPIC] for [AUDIENCE]. Include the main question, concise answer, supporting subtopics, first-hand expertise or data we should add, authoritative sources to research, limitations, and practical examples. Separate known facts from claims that require research. Do not fabricate citations, quotations, or statistics.

GEO-03 — Brand Entity Consistency Review

Prompt
Review these official brand descriptions and profiles [PASTE TEXT/URLS] for consistent naming, product/service definitions, audience, location, and positioning. Create a discrepancy table and recommend canonical wording. Do not infer facts not present. Prioritize official sources and mark outdated or unverified entries.

Social Media Content

SOC-01 — Monthly Content Calendar

Prompt
Build a [NUMBER]-week social media calendar for [BRAND] in [INDUSTRY]. Audience: [AUDIENCE]. Platforms: [PLATFORMS]. Goal: [GOALS]. Posting capacity: [CAPACITY]. Create a table with date/week, platform, content pillar, format, hook, key message, CTA, asset needed, and KPI. Balance educational, proof, community, product, and conversion content. Flag dates that need confirmation.

SOC-02 — Platform-Specific Repurposing

Prompt
Repurpose this source content [PASTE CONTENT] for LinkedIn, Facebook, Instagram, and TikTok. For each platform, adapt the hook, length, tone, format, CTA, and visual suggestion rather than copying the same caption. Keep all claims consistent with the source and identify where a platform's current specifications should be checked.

SOC-03 — Short-Form Video Script

Prompt
Write a [DURATION]-second video script about [TOPIC] for [BRAND] targeting [AUDIENCE]. Goal: [GOAL]. Structure: opening hook, problem/context, 2–3 useful points, proof or demonstration, CTA. Include voiceover, on-screen text, shot suggestions, and caption. Avoid exaggerated claims and make the first 3 seconds specific.

SOC-04 — Social Caption Variations

Prompt
Write 10 caption options for [PRODUCT/SERVICE/CAMPAIGN] aimed at [AUDIENCE]. Platform: [PLATFORM]. Brand voice: [VOICE]. Goal and CTA: [GOAL/CTA]. Include educational, story-led, benefit-led, question-led, and direct-response angles. Use only verified product facts; label any assumptions. Avoid engagement bait.

SOC-05 — Comment & Community Response Bank

Prompt
Create response templates for these common comments or questions [PASTE EXAMPLES] for [BRAND]. Voice: [VOICE]. Include helpful, neutral replies, complaint escalation, pricing inquiry, misinformation correction, and cases requiring a human response. Do not disclose private customer data, argue, or promise resolutions that are not authorized.

SOC-06 — Creative Brief for a Static Post

Prompt
Create a design brief for a static social post about [TOPIC/OFFER]. Platform and dimensions: [PLATFORM/SIZE—VERIFY CURRENT SPECS]. Audience: [AUDIENCE]. Goal: [GOAL]. Include headline, supporting copy, visual concept, hierarchy, brand elements, CTA, accessibility/contrast notes, and what must not be included. Keep the main message readable on mobile.

SOC-07 — Social Performance Analysis

Prompt
Analyze this post-level performance export [PASTE DATA]. Include platform, date range, reach, impressions, engagement, clicks, spend, and conversions where available. Identify top and weak performers relative to the stated goal. Calculate rates only where denominators are supplied, state formulas, account for paid vs organic differences, and recommend controlled tests.

SOC-08 — Campaign Hashtag & Topic Set

Prompt
For [CAMPAIGN/TOPIC], audience [AUDIENCE], and platform [PLATFORM], suggest relevant topic phrases and a small set of hashtags if appropriate. Explain the role of each. Do not claim hashtags are trending without current evidence. Prioritize relevance and audience language over generic high-volume tags.

Branding & Messaging

BRAND-01 — Brand Positioning Statement

Prompt
Develop a positioning statement for [BRAND] using: product/service [OFFER], target customer [CUSTOMER], customer problem [PROBLEM], differentiators [DIFFERENTIATORS], alternatives [ALTERNATIVES], and proof [PROOF]. Provide one recommended statement and 2 alternatives. Flag any differentiator that lacks evidence.

BRAND-02 — Brand Voice Guide

Prompt
Create a practical brand voice guide for [BRAND]. Audience: [AUDIENCE]. Desired traits: [TRAITS]. Avoid: [TRAITS TO AVOID]. Include 4 voice principles, do/don't examples, vocabulary choices, sample headline, social caption, email paragraph, and customer-support reply. Make the voice distinct but usable by multiple writers.

BRAND-03 — Value Proposition & Message Pillars

Prompt
Build a messaging framework for [PRODUCT/SERVICE] for [AUDIENCE]. Customer pain points: [PAINS]. Features: [FEATURES]. Verified outcomes/proof: [PROOF]. Create a value proposition, 3–5 message pillars, supporting proof points, objections answered, and CTA options. Separate features, benefits, and proven results.

BRAND-04 — Competitor Positioning Matrix

Prompt
Using only these competitor notes [PASTE SOURCED NOTES], compare [BRAND] with [COMPETITORS]. Build a matrix of audience, offer, positioning, proof, content themes, and apparent gaps. Cite the supplied source or note for each factual entry. Mark unknowns rather than guessing and recommend ethical differentiation opportunities.

BRAND-05 — Campaign Naming & Tagline Ideas

Prompt
Generate 20 campaign names and 10 taglines for [CAMPAIGN/BRAND]. Audience: [AUDIENCE]. Objective: [OBJECTIVE]. Desired tone: [TONE]. Required words: [WORDS]; avoid: [WORDS]. Explain the strongest 5 concepts. Treat all names as preliminary: trademark, domain, and cultural checks are required before use.

BRAND-06 — B2B Product Messaging for ERP/Software

Prompt
Create B2B messaging for [SOFTWARE/ERP PRODUCT] aimed at [INDUSTRY/BUYER ROLE]. Buyer challenges: [CHALLENGES]. Verified modules/capabilities: [CAPABILITIES]. Evidence: [CASE STUDIES/PROOF]. Produce an elevator pitch, 3 role-specific value messages, objection responses, and a demo CTA. Do not promise integrations, savings, or features unless verified.

B2B Lead Generation & Sales Enablement

B2B-01 — Ideal Customer Profile

Prompt
Develop an ideal customer profile for [PRODUCT/SERVICE] in [MARKET]. Current best customers or hypotheses: [INPUT]. Include firmographics, industry, size, geography, buying triggers, pain points, decision roles, disqualifiers, and qualification questions. Distinguish evidence from assumptions and recommend how to validate the profile.

B2B-02 — Lead Magnet Concept

Prompt
Suggest 10 useful lead magnets for [AUDIENCE] in [INDUSTRY] related to [OFFER]. For each, include audience pain, title, format, value delivered, production effort, funnel stage, and follow-up CTA. Avoid thin or misleading gated content; choose concepts the team can genuinely deliver.

B2B-03 — Cold Outreach Email Sequence

Prompt
Write a 3-email B2B outreach sequence for [PROSPECT TYPE] about [OFFER]. Personalization facts available: [FACTS]. Sender role: [ROLE]. Desired next step: [CTA]. Keep messages concise, relevant, truthful, and easy to decline. Do not invent familiarity or research. Include subject lines and spacing suggestions; remind me to follow applicable email and privacy laws.

B2B-04 — LinkedIn Prospecting Message

Prompt
Write 3 concise LinkedIn connection or follow-up messages for [BUYER ROLE] in [INDUSTRY]. Value offered: [VALUE]. Verified personalization: [FACT]. Goal: [GOAL]. Use a professional, non-pushy tone. Do not pretend we met, imply an endorsement, or use personal data unrelated to business relevance.

B2B-05 — Discovery Call Question Bank

Prompt
Create a discovery-call guide for [PRODUCT/SERVICE] sold to [INDUSTRY]. Buyer roles: [ROLES]. Include opening, current-process questions, pain and impact, stakeholders, timeline, budget process, requirements, risks, and agreed next steps. Use open questions and avoid leading the prospect toward an unsupported conclusion.

B2B-06 — Lead Qualification Scorecard

Prompt
Design a simple lead qualification scorecard for [OFFER]. Define criteria, scoring anchors, weights totaling 100%, disqualifiers, and handoff rules. Criteria may include fit, need, urgency, authority, and engagement. Clearly label proposed weights as a starting hypothesis to validate against actual conversion data.

B2B-07 — Demo Follow-Up Email

Prompt
Draft a follow-up email after a product demo for [PROSPECT/COMPANY]. Demo topics: [TOPICS]. Prospect priorities: [PRIORITIES]. Agreed actions and owners: [ACTIONS]. Timeline: [TIMELINE]. Summarize accurately, answer only confirmed questions, list attachments if provided, and propose a clear next step.

B2B-08 — Objection Handling Playbook

Prompt
Create an ethical objection-handling guide for [PRODUCT/SERVICE]. Common objections: [OBJECTIONS]. Verified evidence and limits: [PROOF/LIMITS]. For each objection, provide an empathetic acknowledgment, diagnostic question, factual response, proof to offer, and appropriate next step. Never recommend pressure tactics or unsupported guarantees.

Campaign Strategy & Measurement

CAMP-01 — Campaign Strategy One-Pager

Prompt
Create a campaign strategy for [OFFER] targeting [AUDIENCE] in [MARKET]. Business objective: [OBJECTIVE]. Budget: [BUDGET]. Timeline: [DATES]. Channels: [CHANNELS]. Include audience insight, single-minded message, offer, funnel stages, assets, roles, risks, KPI definitions, and decision gates. Mark assumptions and missing inputs.

CAMP-02 — Marketing Funnel Plan

Prompt
Map a funnel for [PRODUCT/SERVICE] from awareness to conversion and retention. Audience: [AUDIENCE]. Sales cycle: [CYCLE]. Channels available: [CHANNELS]. For each stage, specify customer question, content/offer, channel, CTA, event to track, KPI, and handoff. Ensure metrics align with the business objective.

CAMP-03 — Budget Allocation Scenarios

Prompt
Given budget [BUDGET], channels [CHANNELS], historical results [DATA], and goal [GOAL], propose conservative, balanced, and experimental allocation scenarios. Show assumptions, expected trade-offs, and what data is missing. Do not forecast precise outcomes without defensible benchmarks. Include a reallocation rule based on observed performance.

CAMP-04 — A/B Test Plan

Prompt
Design an A/B test for [ASSET/ELEMENT] to improve [PRIMARY METRIC]. Audience and traffic: [DATA]. Current baseline: [BASELINE]. Define hypothesis, single variable, control, variant, primary/guardrail metrics, sample-size considerations, duration, stopping rule, and interpretation. Do not declare a winner from inadequate data or change multiple variables at once.

CAMP-05 — Campaign KPI Dashboard Specification

Prompt
Specify a dashboard for [CAMPAIGN/OBJECTIVE]. Data sources: [SOURCES]. Include KPI, definition, formula, breakdown, reporting cadence, owner, and action threshold. Separate leading indicators from business outcomes. Identify data-quality checks and avoid vanity metrics unless they serve a defined purpose.

CAMP-06 — Post-Campaign Review

Prompt
Analyze this campaign brief and results [PASTE BRIEF + RESULTS]. Objectives: [OBJECTIVES]. Summarize outcome vs target, channel contribution where measurable, what worked, what underperformed, likely explanations, limitations, and 5 prioritized next actions. Distinguish observed facts from hypotheses and recommend what to test next.

CAMP-07 — Integrated Campaign Asset Checklist

Prompt
For campaign [CAMPAIGN], objective [OBJECTIVE], audience [AUDIENCE], and channels [CHANNELS], build a launch checklist covering landing page, tracking, creative, copy, approvals, CRM, sales enablement, accessibility, QA, schedule, and contingency. Assign an owner role and due date placeholder to each task.

CAMP-08 — Executive Campaign Summary

Prompt

Convert this campaign data [PASTE DATA] into a one-page executive summary. Lead with the business result, compare performance with targets, explain the most important drivers, disclose limitations, and list decisions required. Use concise language and only supplied metrics; put detailed channel metrics in a compact table.

Worked Examples

The following examples use fictional business details and are illustrative only.

Example 1 — B2B ERP LinkedIn post

Northstar ERP is a fictional ERP product for apparel manufacturers. Supplied facts: inventory, production, purchasing, and finance modules.

Illustrative output
Disconnected production, inventory, and finance data can make it harder to see what is happening across a factory.

Northstar ERP brings production, inventory, purchasing, and finance workflows into one system, helping teams work from more consistent operational information.

Exploring ERP for your apparel business? Request a demo to discuss your requirements.

Review: Confirm product facts; avoid unverified savings claims; add an approved link.

Example 2 — SEO content brief

Topic: ERP software for apparel manufacturing. Audience: factory leadership and operations teams. Intent: commercial investigation.

Illustrative outline
• Choosing ERP Software for an Apparel Manufacturing Business
• Common operational challenges
• Core ERP capabilities to evaluate
• Questions to ask during an ERP demo
• Implementation and change-management considerations
• Frequently asked questions

Review: Validate keywords and metrics in an SEO tool; confirm product claims; add original expertise.

Example 3 — B2B demo follow-up

Subject: Follow-up on the ERP demonstration

Hello [Prospect Name],

Thank you for your time today. We discussed your team's needs around production planning and inventory visibility.

As agreed, I will share an overview of the relevant modules. Once your team has approved sharing a sample workflow, we can review it and identify any additional requirements.

Would [proposed date/time] work for a follow-up discussion?

Best regards,
[Your Name]

Review: Confirm next steps, use approved materials, and replace placeholders.

Quality & Responsible Use Checklist

- Verify all factual claims and citations before publishing.
- Do not invent statistics, testimonials, customer names, or product features.
- Check current search-engine guidance and platform specifications.
- Never upload confidential employer or client data, credentials, or personal information.
- Use fictional or anonymized examples unless you have permission.
- Record actual model, input, output quality, issues, and retest result in TESTING_LOG.md.
